

## Part Two

# Responsibility and Transformation

## An Interview with Lani Calkin

*The second in a three-part series of an interview with Lani Calkin, conducted by Jenny Spiers, as research for her thesis 'The Shift in Consciousness in New Zealanders'.*

*Lani Calkin of Mt Eden, Auckland works with individuals and groups to help them connect and develop their spiritual energy.*

**JS:** *A number of people I have questioned have talked about a sense of responsibility and presumably that is an inner knowing that one has a responsibility to fulfil a certain function or mission?*

**LC:** That's right and these are the ones who have been given this knowing either before they incarnated into the present body, or in childhood days and that sense is being awakened in people now. We have the responsibility to let this energy come through to the Earthplane and it will come through and transform the people and planet. We will truly be beings of light. The visionaries have spoken of beings of light and this is what we will become.

It is like an energy that is passing through the universe which is nearing Earth and will encompass Earth and it encompasses it in its loving embrace. It is a very powerful energy and it will burn those who are not ready for it. It will burn those who have a lot of lower negative traits. Thoughts of harming other people for instance – that type of person will not be able to carry this higher vibration because it is pure. It is love. In

some way only those who are whole in themselves can carry this energy and be transformed. They will be uplifted and this, I feel, is the great upliftment that is spoken of in the bible and by prophets.

The upliftment process is the upliftment of our consciousness and of our body and being by this higher energy which is coming through and we are learning to channel that in our attunement. At the same time, in surrendering to the higher energy to come through us we are inviting it to come through to the Earthplane. We are treating it as an honoured guest that we invite to come through into our body and being and into the body and being of humanity and of the planet. For in a sense we hold the planet in our consciousness and in that way we are the planet. We are Earth. We are Gaia – whichever term we use to describe it. It is held in our consciousness and there is a possibility of this higher energy transforming it into a glowing radiant light. We see the great teachers on the planet today who have awakened to their higher purpose and they are radiant, they are glowing, and each one of us also has the opportunity to be like that.

**JS:** *Is there any more to say about the Earth being in our consciousness?*

**LC:** Everything that we perceive around us is in our consciousness. It wouldn't be there without our recognition of it, and the Earth is here because it is in our consciousness. In a sense it hasn't even

manifested. We haven't even manifested our true self yet. We are just in the forerunner of creation. This great energy that is coming through to the planet, which some people term as the second coming of the Christ, will bring through the complete manifestation of how we truly are to be. The planet is in our consciousness and therefore has yet to become its full self as well.

**JS:** *So what you are confirming is that both humans as a species and the planet are on the edge of an evolutionary leap?*

**LC:** Yes, I feel that, I feel we are very close to a great transformation.

*The call has gone out.  
Wake up humanity.  
Wake up to the higher  
calling.*

**JS:** *And you talk about the 'heat' of this process and that it will be difficult for people who have not made the necessary transitions for that evolution.*

**LC:** Yes. I feel they just will not be able to handle the energy which will come through and in this way we see a lot of suicides, we see people dying and leaving the planet. Some people are leaving because they know what is to come, subconsciously. I believe that it is only the pure who will survive. Those who
