

the higher consciousness, to channel this energy, to become instruments for it and the way I have been taught and guided from the inner levels is that we must surrender our human thoughts and allow the higher consciousness to come through and fulfil its plan.

JS: *Would you say you have a mission?*

LC: I know I have a mission. I know I have information to impart to people, to guide them, to direct them. I know there are a lot of people who have the same information that I have deep within their levels of consciousness that is waiting for the triggering point.

That triggering point is happening here, there and everywhere right at this minute. It will happen in an ongoing fashion over the next few years.

I know a lot of people have been trained and placed on Earth to take part in a great, great upliftment process. I see it happening in small ways with people becoming aware that they have a part to play and they are instruments.

*I know that at a
specific time we will
be given the
instructions to perform
our functions and we
know deep within each
of us, what that is.*

It doesn't mean that we all have a very active and prominent role in the community - to be out front in a big way - its not like that in all cases. Its a matter of each individual quietly at home or wherever they are, perhaps in a working situation, simply surrendering to the higher consciousness, acknowledging they have a role to play and letting it come through.

I know that at a specific time we will be given the instructions to perform our functions and we know deep within each of us, what that is.

At some point there will be like a button pushed and we will be activated and we will be true instruments, linked with Source.

JS: *So what you are describing is true of every individual on the Earth planet?*

LC: No, not every person will be an instrument, there will be some who will listen to people who are instruments and will carry out their duties blindly, just following.

JS: *Do you perceive that some people have come here for karmic reasons -*

they are here to grow and learn and evolve but they are not here for some greater function in terms of the planet, or humanity or the universe.

LC: I think that is true of some people, yes, but everybody has the opportunity to go beyond even the karmic reasons. If we look at karmic reasons as perhaps in the sense of paying back some debt, that will be wiped out if they are raised enough in their awareness to carry this higher energy.

I believe that that is Grace in operation and that many many "debts" so called, many many karmic reasons will be erased if they are willing to see and accept that they have a role to play and a higher purpose in life.

JS: *There is a lot of talk about the morphogenic field and what you are saying could be interpreted that a certain critical mass if you like, of people on the planet, have come here with the purpose of awakening to that higher consciousness and thus the transformation of humanity, so that the whole planet is transformed.*

LC: Yes, you might look at it in the symbology of an army. And the officers and men have come on Earth and they have been given their orders. They are under orders of the great command and they move among other people who are not part of that command to help them survive what is to take place, to reassure them that all will not be lost, that they need have no fear.

The workers in the army are all those who are on Earth who are here and will awaken and I believe most of them will awaken when the signal is given. ☸
