

## QUANTUM / ENERGY INFORMATION SERIES

THE NEW WAYS – 13 March 2018

Deb Taylor of SOUL-LOGIC.NZ and Lani Calkin of OMEGA COMMUNICATIONS.CO.NZ

L. I feel I am around a pool of water, in a grotto, a cave, lit with blue-ish light. Beautiful. Withdrawing from the world into this beautiful place. I hear water flowing into the pool and it flows out over some rocks into the ocean. I smell the sea, I can smell the water in the cave. I feel I want to dive into that pool of blue water.

D. Do that and see where it takes you.

L. I am diving into this blue, not like what you see in the ocean, it takes me down to a home, its where I am living, I feel I am one of the Mer people. I see the tail.

D. How does that feel with the mermaid tail in that beautiful water. Can you describe it for us.

L. it is just who I am. I come up into that cave now and again to look out across the surface but I don't go out over the ocean, I go under the ocean because this cave – it flows out under the water to where we are working and living under the ocean place. It is a different time. We are harnessing energy through the water – its connected to the star constellations. We bring in streams of energy, of light, especially we work when there is not the sunlight right above us. We work when the sun is in a different position so that we can work and fabricate a network of energy. This is for the purpose of purifying the water, sending out through the water on the planet a better line of energy, but it is also communication. Communication is carried through the water into different patterns and we are creating different patterns in the water which are designed to touch certain people – touch everybody who enters the water – and it gives them the feeling of remembering something much deeper. We are doing our part in one area of the oceans on this planet and it is to create these patterns and formulae and codes from the water. It is necessary because people have got out of touch with what water really is, and the patterns in the water.

D. when is this happening, happening now or a long time ago or in the future?

L. This was before much of the area on the planet was filled with people, before people were born and evolved, when people were moving through the ocean in carved out vessels from trees. They were using what they could create to move between land masses. We quietly worked underwater under the oceans, away from people's sight.

D. Is this right at the beginning of time in Earth's creation or were there people still on this Earth?

L. There were people already on Earth, where I am now there were people, but we have been here a long time, before I was birthed and before I was working and taking my part. We work with equipment, with patterns that we cycle energy through, drawing it in from another dimension and we work with it to create these patterns that we release out into the ocean.

D. So the equipment, is it physical, tangible equipment?

L. To us it is, because we can work with energy, it is more energy based.

D. And who are you communicating with, communicating the patterns?

L. We have various groups that we work with coming into the planet from different dimensions. They carry the energy in, it is transported into the Earth and this has been done for many cycles, many years. I don't know how to measure the time. It exists out of measurement of time. It is drawn in depending on the need and what is required to contribute to the overall adjustment of the planet into shifting it, into moving it into a different field of information and knowledge. It has got to be changed. It is not putting out the right energy and we are called to do this, to help put out the energy into the planet through the water.

D. So how do you change it to match the energy now?

L. It is converted from what we receive from the ones from different parts of your star systems. It is converted through intention and changing the light and energy of it. It gets transferred from one type of existing matter or material into another type of energy that is able to move through the oceans and pattern. It creates a vibration. The vibration is the pattern. What we do is receive the codes from these other places and beings, and in turn we convert that through intention. It is known in our being how to do this.

D. The codes sound interesting. Can you explain the codes that you need to convert and how they work?

L. They contain a whole energy fabrication. It's a plan, it has to be deciphered. Each code has an enormous potential of creation in it. We don't see it as something solid. To us it is changing patterns of colours and light and vibration.

D. I know it's a very human question, but who sends out these codes from other dimensions? Where is it all coming from?

L. They are from civilisations from parts of the starfield that you might call the Pleiades and these Beings have been assigned to help stabilise civilisations such as those that have evolved on Earth in such a way that the process of evolution will develop in an expansion of goodwill and joy throughout all of existence. They came from that area of existence, seeing the need. It was known that energy was needed to assist the planet.

D. So this is all natural energy from a very good source – its not harming our Earth in any way?

L. Oh no. It brings in sophisticated ways to enable the living creatures, the animals on Earth, to absorb the higher energy. Its another way, you see. There are many ways of helping assist evolution.

D. Could this energy be used for what we call energy today such as electricity, for powering our lights and so forth. Is this the kind of energy that we can use?

L. The information in the codes that are brought into the Earth can be interpreted in ways, as you say, to facilitate certain mechanisms for the livingness for the civilisation to use.

D. How could this information help the human race now, to protect the Earth and to heal our Earth. Is this a way that could do that?

L. Yes, the people – it needs the people to understand within their hearts that this can be done. The heart energy centre in humans, and it is the humans who are needed to create, the heart centre

interprets and receives the energy and then it needs to be processed in a way it can be manifested into some form through the awareness, through the actions of the people.

D. okay, so what kind of awareness needs to happen, or can happen on a conscious level for these to manifest.

L. It is already happening. Over many recent life phases and we are talking about the extent of two or three generations on Earth at the moment, people have been aware that energy can be used, even people who were aware of the vitality within the rays beamed into the planet from the sun, they realised that could be used to create another form of enlivenment and activation of whatever could receive that energy or contain it. In current phases of evolution it is also able to be received by people who attune themselves to the patterns of energy coming in. Some of these people were born into the bodies and are coming to the point of remembrance that they are needed to receive this energy and to get together in groups to put it into creating vehicles or apparatus that can hold the energy, releasing it out. There needs to be the introduction of receptors and devices to enable this process and there are people who are working in this way already.

D. So those are the people that have already had this remembrance, and the group to work with them

L. Small groups of even two people, one who is creating the apparatus to receive and matching – what is needed is a receiver and a device that emits the energy, transforming it, and those two must be harmonised on the same frequency and then there is transference of, this could be seen like liquid patterns. Liquid because it is flowing energy. There was a time when this was being initiated in the planet's history. If we talk about it in another existence, the consciousness of which still exists, the field of creation of it still exists, it would have predated many civilisations as you know it to be. What is going to be coming into appearance – just as people were excited to know about pyramid shapes – the next revelation will be spheres of energy that have not been commonly seen, because they are of a higher vibration. These spheres of energy enable the use of energy to enliven and activate the devices needed. First of all it will come through in ways to be used to correct the vibration and energy field of people, of areas of land, of creatures and from then it is being developed into methods to power machinery, as you would know it to be. So, there is a whole level of existence coming into being of this type of technology.

D. When is this coming in? When is this revelation of people being able to see these spheres of energy?

L. There is a momentum and engagement of all this at the time presently beginning, so in your timeframe of life, your life journey, you will be hearing about this more, you will be seeing it being used. Light. It will be called Light technology.

D. Is it already being called that at the moment?

L. Some of it is, some of it is being used to restore healing patterns for bodies and places and creatures.

D. And are the people of power aware of this – do they entertain the idea of this?

L. Yes, there are people, as you say in power, who are aware of this all around Earth planet. There is a sense of knowing the right timing to introduce it, because it is also able to be used to manipulate minds, to manipulate people. It is like any power source it could be used in a different way.

D. So they need to be careful how they introduce it?

L. Yes. Alongside all of this is energy and groups of people working to correct the patterns that affect humans who work along destructive ways and there are also in place, areas around the planet that are working to emit peaceful energy. We are aware of your discussion about energy frequencies [theta range] and it is working with those soothing energy frequencies that will help trigger the awakening in some of the people. Those energy frequencies are also similar to what is being put out, as we first began this discussion, through the underwater areas emitting this same pattern of harmony and working on multi layers of existing, working through thought patterns, emotions and deeply physical. It is all working to open many gateways – portals – and not just from the Beings from the Pleiadian constellation, but also many other dimensions where people are coming forward to participate in this programme of upliftment, of exchange of information, sharing the information to change what had been happening on Earth.

D. What has been happening on Earth up until now?

L. Yes, the way that there was too much pollution of minds and vitality, the air that is breathed, the water.

D. So we are talking about present time 2018, this is what is happening?

L. Yes. There are many, many, beautiful introductions of this energy which is going to help people.

D. So is this considered to be any form of interference? This is all to help?

L. This is all helping because the beings already aware of such things on Earth have asked for it to be revealed.

D. So they have had information coming through to them to know this will exist as well?

L. Yes many of them were born with the information, they come in with it but had to evolve in the normal process of life, to get to the stage where their energy was harmonised with what they intended to bring in.

D. So how were they able to find each other in these groups to collectively be working on this project.

L. Some of it has happened through the connections that are made when they go into sleep state. Some of the people are aware when they put themselves into the deep trance states, they connect in together ..

D. They connect together?

L. Yes,... some of it you call telepathy, conscious communication.

D. And that is how they were able to communicate and find each other – is that correct?

L. Yes, a lot of it happens in that way and when it is necessary they will use the current technology and share ideas.

D. And is this group of people from many different generations, like you said over two or three generations?

L. Yes, some of them in the generations have been born again to carry on the work.

D. So they have chosen to come back again to continue the work in the present day?

L. Yes and that civilisation we referred to where this was used, the Beings can still connect in from that timeline into this timeline and some on a higher aspect of their own being. You, yourself have the ability to put yourself into the state to connect into the timeline where you are already working in the same way. Most people who have awakened to this fact that they are here to help others also have the ability to connect into an aspect of self that is already doing it and to bring information from that different aspect into the current phase and this speeds up the implementation of the newer technology, the newer light way.

D. Ok, wonderful. With this information all coming through – what are we to do with this now, because there is so much information and we want to only do good with it and not cause any harm for it to be used in a manipulating, or wrong, so to speak, way. So what can we do with this information, or why is this information coming through to us now?

L. Initially, even with the knowledge being imparted now, the intention of it creates a field of energy around your thoughts about it, around your own consciousness levels, your energy field, because knowing about it puts the vibration of it in the energy field, which can be detected. Therefore, in bringing this information through to everyone who receives it, there is – as you would say protection. Those who receive it in the intention of helping already have the way to interpret it, to pass it onto people to help them in helping others, so what we are saying is that there is some protection in the energy contained in the words of this information, within the pattern of it.

D. So its within the idea, within the concept that is now being put out there?

L. Yes it has a self-protecting energy field.

D. Okay, I like the sound of the self-protecting energy field and that's for anyone listening to it with the right intentions?

L. Yes. Now, we do have to say there are similar types of manifestations which can come into Earth. they will not power the same devices or influence the people who have already created this and are working with it in a different timeline. So, there is that existence. It is that they will not be able to interfere with this energy we are speaking about with the introduction of it and the ongoing evolution of it. it will not be transferred in any way to the ones who would want to use it in a different way. It will not work.

D. Wonderful, so it works purely on the intention rather than anything else.

L. Yes. And it needs the evolved consciousness of the Beings to be able to interpret it and use it and take it in.

D. Right, so when we have got the love and light to help others to help the planet – that will help activate it? Is that correct?

L. Yes that is correct

D. and if you do not have that awareness or that love to help others, it will not be activated. Does that put it into simple terms?

L. Yes. We understand the difficulty because it is given to you on multi layers, on more than one layer of understanding. The usage of it needs the Beings to open their consciousness field to how it can be used, what it can be used for, and the concepts of it will come into the individual consciousness and that is how creation comes into beingness. It is manifested through those ways of creation in the concepts that are coming in, because the concepts or the codes – the codes have these concepts – and just like anything that is created there is the concept first of for example, yes we will build a city that is powered entirely by this new way or energy, or yes we will create a home that is created using intention and thought and using energy – now, how can that come about. You open your consciousness field to allow ideas to come in and when even one person does that, receives it on a higher vibration, then everyone connected with that individual is also receiving the pattern and it gets amplified and there are ones who are used to interpreting it and then have the tools to create. So this is how new inventions come into beingness and this is how the new energy will come into being used. Already it is in secret private places being developed.

D. By these groups of people with good intentions?

L. Yes.

D. Can you pinpoint or tell us whereabouts on this Earth, or what countries are working on this?

L. There are some smaller land masses, islands you would call them, where some of this is happening. One of these we identify as Hawaii, there is also a place in the frozen land mass in the southern area of the planet, and there are small pockets of places in northern Europe and in the northern parts of Canada, there are also places in South America, there are also places in the South Island of New Zealand, away from the cities. These places are away of heavily populated areas.

D. It sounds like it is evenly spread around the world.

L. Yes and there are pockets increased. These are just a few we are describing.

D. And all these groups – they are aware of each others work?

L. some are connected

D. but it is all the same kind of work, gathering the energy in the same way you are describing it?

L. Yes, and there is some reluctance to speak about it on this one, but there is a place in the North Island of New Zealand in the central area. The people there also are aware of connecting in with these new creations.

D. and what does their work, as humans, actually involve on a physical level. What are they actually doing to activate this

L. They are working with materials which have come in – the way to use the materials has come in from other dimensions, other planetary systems because there is a way of working with what exists on planet Earth to change the molecular structure of it to form other – not like metals – but other formulations that can be moulded and shaped – other material – and it is this new type of material that

can be used to receive and amplify the energy that is used. Just as you are aware that crystals have been used for a long time to receive energy and to be used, there are different ways of using that and some of the substances that are within minerals in the planet.

D. These materials – if they come from other dimensions are they renewable within this Earth or do they need to keep coming through from other ways?

L. they can continue to be used, created on what is available here in the planet

D. so it can be made now.

L. yes, the concept of it basically, because what was given to the planet over stages of its evolution, some of those came in from Beings who brought them to the planet and they have existed here. they have been viewed mainly – as people became aware of measuring energy, they found that energy was different and even a slight difference in gravity in certain places around the planet and this is where some of these other energies from other planetary systems were implanted and brought in. this has all been revealed and discovered and it is some of those that is being used to create different substances.

D. Can you give us an idea of these different substances and materials as to what they would be made out of from this Earth?

L. they come in with the appearance of translucent and shimmering, malleable sheets. They can be formed into flat sheets, it can be shaped into shapes, but it gives the appearance of shimmering and translucence, a little bit of opaqueness, can be shaped into spheres to hold energy and some of those are the communication aspects of the system. As we are talking about this, you may be having a sense of various areas upon the planet being linked up and communication flowing between them.

D. Yes, I am seeing like particles all connecting together, but we wouldn't actually see with the human eye but its all there, shall we say, beyond the veil

L. Yes.

D. Now there is talk about a solar flare on 18 – 20<sup>th</sup> March this year, like a shift or energy wave. Can you explain this for us, or what this has to do with.

L. I am going deeper to have a sense of this

D. I find it interesting that all this is going on at the present time and there is more awareness of things like solar flares happening and its more in the media and the general public knowing about it now

L. People expect different effects, people expect it to destabilise communications and destabilise the planet. it has always been that there have been rays of energy suffusing the planet and the energy is necessary for people, to help adjust their energy frequency to, for moments lose the sense of who they are as a human form, and for moments to lose the sense of time and place. When that happens, they are shifted into different concepts and different realities, so in this sense, when these rays come through from the sun, they are also emitting signals which the bodies can respond to in such a way that they may feel they are uplifted out of time and out of physical matter, and they will be, according to their own receptivity. If they are not receptive to the rays of light, there will be disturbances in their thoughts and perhaps physical symptoms of nausea or headaches. This has happened continuously and there are often

rays coming forward to people that are not spoken about as are these rays or flares from the sun. It has been happening many times. What we do ...

D. Many times over the life span of the Earth?

L. Oh yes, as long as there has been and is, existence, the central sun has been changing and emitting rays of light and the warmth and the light and the sending forth as flares as they are called. Expansions.

D. So it is all for expansion?

L. Yes.

D. Going back to this energy source that is coming through, being discovered and coming through now – is this what is going to help harmonise and help balance out these rising energies that are coming through the new technology that is happening in the planet now [thinking about 5G] or is it going to cancel them out. Are you able to expand or explain that?

L. It will help the expansion of the new ways of working with the light and energy and it will help the energy of the physical form – the body - what is needed is the new ways of using the Light that we have been speaking about. That is needed rather than the pattern that has been worked on, but saying that, it is unfolding and the more that the technology is changed and evolved into higher energy, the more the creators of it will realise they are tapping into the pattern of using Light and Energy, so it is all happening to come forward as evolving and using light technology.

D. so is this a way of saving the planet, by using this kind of energy rather than unrenewable energy such as coal and such.

L. Yes it is evolving and it is not like good or bad or failure. It is the existence and experience of different creations that helps people evolve and it is through the experience that changes are made, they realise the effect of some of the experiences and creations. There will be a point where the science of technology will meet this different concept and when that happens, that is the inclusion in the web of the higher consciousness field, the inclusion of those ones who work methodically you might say, but they are learning to grasp onto different concepts and learning to find ways to put it into instruments. What is happening is that at present everything is geared around finances and limited by finances in many ways, whereas the shift to the concept of using the energy and discovering the energy devices that have been implanted on the Earth will release that new technology available for everybody, not as an expensive item that needs amounts of money to buy. That is the shift that is needed and it is taking some time to allow that to be the predominant pattern, to bring it in.

D. Wonderful, thank you for that explanation. Is there a next step, if it is appropriate for us to take with this. What is the next step that these groups will do in order to bring it forth some more to let everybody know about it who supposed to know about it.

L. It will be made known through your devices you already have to observe, the information will be released through your communities through the way you communicate around the Earth at the present time. It will be used in that way.

D. Will there become a time, if it is appropriate for us to know right now, when this will be our main source of energy on this planet Earth?

- L. A timeframe is not able to be given at this time because it keeps shifting.
- D. Do you know if it will eventuate into that at all?
- L. Yes it is working toward that, it is moving TO that, it is gaining momentum to that, and in your lifetime
- D. So, pretty soon...
- L. Yes
- D. Because we do see in this lifetime so much destruction and we know it cant keep going on like this, so it is like it needs to happen quite soon
- L. There will be a continuation of what is happening now and it will be existing alongside the newer ways – we will call it newer ways, holistic ways – and the newer holistic ways will be there to provide the ways to people when it is needed.
- D. Like one step at a time, one group, one country at a time kind of thing
- L. Yes, small pockets everywhere which will expand into uses, for you will understand there are many people to be touched and introduced to the different ways.
- D. Yes, this new concept. So, in effect these old ways are harming the Earth are going to continue. Is this way helping as it grows to harmonise that other way out, as it slowly starts to spread and take over.
- L. Yes it is expanding, perhaps visualise it as light expanding from small pockets and places.
- D. This information that is coming through now, as Lani and I were having a discussion about earlier, how can we use this to help our community and put it forward for the greater good to help others. What is the best way that we can use this information, to help our human race today to see beyond what they may not be seeing, to know there are other concepts out there for the good so we can all create that positive vibration to help it along?
- L. It is useful to release this information in a way that you can both share it with people you know with your - you might find there is already established people who are sharing advanced information like this and it can be presented to them. You must individually hold the intention that it goes to the right people and you know the greater level of consciousness is aware of that already with the connections
- D. As long as our intentions for it is still pure then it will reach others who will take it with the best intentions as well for the greater good for humanity and evolution
- D. thankyou and we will trust our intuition as to what would be the best way
- D. Do you have any other information you would like to share with us or that you are aware of right now that is coming through?
- L. No, there has been quite a lot of information given

## The Sub Conscious

D. Why was it important for us to hear this today.

SC You needed to know it, it needed to be shared, it needed to come into conscious knowingness and it was in this way that it could be delivered and to allow the information to come through at this time to prepare you both to receive the next opening channel. It is as if the waves of energy coming in opens another channel within you each and so when you will meditate to receive that energy, which is very close, and in consciousness you might be sensing it already, then this allows that information to come through and be put into useful understanding and concepts, but it was needed to come through first to give you the knowledge of what is to be and then you will be aware that the energy coming in will certainly strengthen it and activate it.

D. Wonderful thank you. It was definitely what we were wondering about and wanting some information on it. thank you for sharing this information and purpose.

SC While we are not giving details of what the creations are, it helps to know that knowledge about it is there and the intention and the energy and even the protective energy. That type of energy can be used also to prepare the right procedures and avenues to be used in the current civilisation methods for instruments to be shared. Because there is a certain amount of paperwork involved in any new creation, which can delay these inventions coming out.

SC at certain times when it is needed for more than just the information about this to be released, which can be released at any time, the actual manifested products can be released around the world simultaneously as is down now with certain devices you have, so it will be that type of way that will happen and that needs to be done in a coordinated way and there needs to be more people awakened yet, to be tuned into the higher purpose of everything.

D. so this is how we can help by putting this out there so everybody is supporting this vibration..

SC Yes and then there are the ways shared through the greater community linkups around the world to happen

D. is there any kind of timeframe that you will be able to put on this, I know you said within this lifetime but is there any narrower timeframe to put on it for our curiosity sake, when it might happen around the world?

SC It might take some years, even 6 to 8 years before it is really out there and people are using them.

D. Is there any other advice or help you can give us on that topic

SC For now, just keep the awareness of it, keep being aware of hearing news items or comments from people who also have heard about all of this and know about it

D. Does it have a particular name at all - you said the new ways. Is there a name that others give it

SC There is a name, like bio-plasma energy, because that has movement in it, a flowing type of energy movement.

D. But the groups don't have a name or a label so far?

SC Not aware of that.

D. Thank you very much, we really do appreciate it.
