Session: The Quantum Field

Date: November 9, 2021

Earth Time: 8 am New Zealand

Omega Communications Portal

THE QUANTUM FIELD

“What we have to tell you may not make much sense to you, but in order for you to attain the level of existence that is offered to you all, there is the need to step aside from the storyline and to enter within the upper levels of consciousness into the state of existence in the quantum field.

The quantum field is a higher order. It is a natural process and in the quantum field there is the resonating effect which draws together the particles and the processes relating to matter and matter is affected by thought and in the exchange of information as the two states of existence come together, there is formed the pattern which has the codes and the sequences that then unfold into the creation.

All of this takes place in the quantum field and it is a coherence. When you step into direct connection and entry into the quantum field there is this exchange and balancing and a combination that is necessary that has already been achieved and in accessing it, the human energy field then creates the specific energy and presentation of drawing together of the elements that can be changed in order to create the sense of restoring a higher civilization. The civilization has already existed and continues to be present that is being referred to.

The essence of this is to continue to link in with the quantum field - consciousness - consciously moving into connection to that quantum field. This shifts some of the processes in the exchange of thought and matter and it works to bring in the coherence between the organic cellular systems in the bioenergetic field with the quantum field. It is harmonious. It works together.

There will be more of this come into the realizations as you continue the process that was initiated in a different time reality. That is all we needed to express to you.”

Thank you

Lani
